

ADVANCED RADIOLOGY PARTNERS -- HISTORICAL REPORT

Prior Non-Contrast Head CT Examination (For Baseline Comparison)

Patient Name: Ahmed Ali
Exam Date: 2024-03-10 (Historical Baseline)
Accession Number: RAD-CT-2024-88102
Modality: Computed Tomography (CT) Head / Brain without IV contrast
Referring Physician: Dr. Kareem Adel, MD (Emergency Medicine)
Indication: Minor head contusion following slip and fall at work

Comparative Findings:

- No evidence of acute intracranial hemorrhage, extra-axial fluid collection, or mass effect.
- Ventricular system and cortical sulci are symmetrical and normal in size for patient age.
- Basal cisterns are patent. Bony calvarium and skull base appear intact without fracture.
- Visualized paranasal sinuses and mastoid air cells are clear.

Impression:

1. Normal non-contrast head CT scan. No acute intracranial trauma.
2. Note: CT scan from 2024 is remote and did not utilize MRI soft-tissue parenchymal resolution.

Interpreting Radiologist: Dr. Tariq Al-Sayed, MD -- Board Certified Radiologist
