

# Outpatient Neurological Progress Note

Patient Name: Ahmed Ali | Age: 45 | Date of Encounter: 2026-08-15

Chief Complaint: Persistent frontal and occipital headaches x 6 weeks.

Subjective: Moderate pain (6/10), unprovoked, daily frequency.

Medication Trial: Ibuprofen 600mg TID (4 weeks) - no relief.

Physical Exam: Cranial nerves II-XII grossly intact. No focal deficit.

Assessment: Refractory tension-type headache with migraine features.

Plan: Order non-contrast brain MRI to rule out structural intracranial pathology.
